EDUCATION

University of North Carolina at Charlotte - Charlotte, NC

December, 2027

Bachelor of Science in Data Science

Wake Technical Community College - Raleigh, NC

May, 2025

Associate in applied science, Computer Programming and Development

EXPERIENCE

She Built This City - Charlotte, NC

Summer 2026

Data & Reporting Intern

- Designed Google Forms and connected Google Sheets for monthly and quarterly reporting across five departments and programs in Charlotte and Greensboro.
- Created conditional form workflows, response tabs, and scoring calculations for internal reporting, youth feedback, and proposal evaluation.
- Migrated two organizational datasets into Airtable and prepared walkthrough materials to help staff evaluate and use the new system.
- Worked with project leads to turn changing requirements into clear, user-friendly data collection tools while meeting short deadlines.

Carrabba's Italian Grill - [Charlotte, North Carolina]

February 2022 - Present

Server & Kitchen Team Member (Part-Time)

- Support both front-of-house and back-of-house operations in a fast-paced restaurant while maintaining service and food-quality standards.
- Handle guest requests, POS transactions, and team coordination; recognized through positive guest feedback and online reviews.

Jasmin & Olives - [Raleigh, North Carolina]

June 2019 - September 2021

Shift Leader, Cashier & Line Cook

- Advanced from dishwasher to line cook and shift leader through strong performance, reliability, and willingness to take on additional responsibilities.
- Opened and closed the restaurant, handled cash and POS transactions, coordinated team tasks, and helped maintain customer satisfaction during busy shifts.

SELECTED PROJECTS

Hunger & Crime Data Analysis — In Progress

Python, Pandas, REST APIs, Jupyter Notebook

- Analyzing the relationship between hunger levels and crime rates across countries using publicly available datasets and APIs.
- Cleaning, combining, and organizing country-level data by country and year using Python and Pandas.
- Developing data visualizations to explore trends and identify possible relationships between hunger levels and crime rates.

Book Finder Web Application | HTML, CSS, JavaScript, Flask

Team Project

- Designed and developed a responsive front-end interface for a book discovery platform, including login, registration, search, profile, favorites, reviews, and book-detail pages.
- Used JavaScript search results dynamically, filter book categories, and connect the interface with Flask routes.
- Collaborated with team members responsible for the backend and database to integrate reusable Jinja templates with application data.

Census API Data Analysis

Python | pandas | seaborn

- Used a Jupyter Notebook to retrieve public Census data through an API, organize it with pandas, and create clear visualizations for analysis.

SKILLS

Programming: Python, SQL, HTML, Java Script

Libraries & Tools: pandas, NumPy, Matplotlib, seaborn, Jupyter Notebook, GitHub

Data & Productivity: Google Forms, Google Sheets, Air table, Microsoft Office

Languages: English, Persian
